**Words are energy, and it will depend on
the energy and power of
LOVE/Conviction you put into your
words as to how successfull your
creations are.**

Duality

Whether humanity likes it or not the time of duality is almost over.

With the energies that are flowing into the Universe/Mother Earth we are being nudged into the next step of our evolution.

We are moving into Triality and we can choose to move into it with ease and grace or with resistance.

Either way, that is where we are headed.

To the EGO this might seem a terrible thing. However! When you can move these statements into your heart space! You will recognize the love and the beauty of these words.

TRIALITY

The Power of the merged energy of the electric (masculine) magnetic (feminine) and the LOVE energy of the Divine combined into this pyramid of flowing, ever moving energy is the energy of the NEW HUMAN.

This is the energy that is taking us into the next cycle of humanities evolution.

The AQUARIAN AGE.

Usefull facts!

**Universal
Consciousness/God
does not judge.**

**It is threfore wise to put out to the universe that
which you “DO” desire to create and not that which
you “DO NOT” desire to create.**

**Work “WITH” the LAWS
of the Universe!**

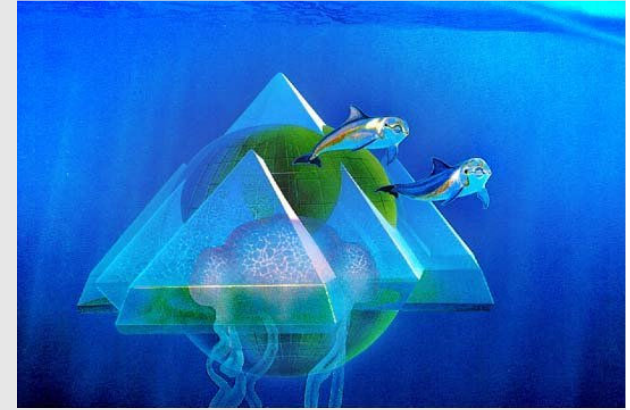

**If you need proof that what you put out always
returns multiple fold.**

Look at the simple example of the tomato seed.

Our gift from us to you is a recording of these 3 activations for being present at this seminar.

Learning to live in Triality

First of all we will ask the masters during a guided meditation/activation to place a gaurdian within you to assist you to be aware of the words you use in your thoughts and conversations.

Awareness, observation and transoformation now and done with a passion will bring many beautiful, magical and wonderful experiences into your life, it will certainly save you from experiences in your near future that you might not desire to create.

As we share examples of words that you would wish to transform, you will understand more deeply how to empower your creations/manifestations bringing them increasingly faster and with accuracy.

Guided Activation

This is a guided activation to help you merge the electric (masculine) magnetic (feminine) energy within you.

It will assist you to be more balanced.

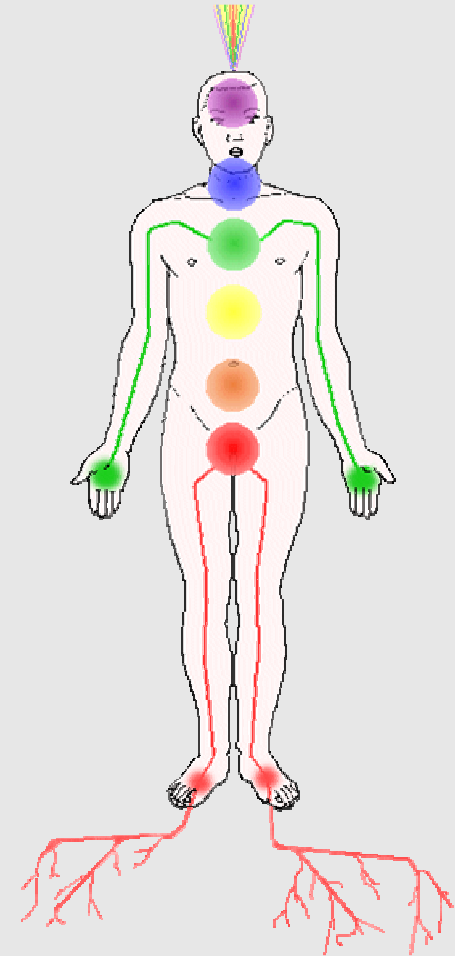

When used regularly it will assist you to work automatically with either the masculine or the feminine.

When merged with the source energy changes take place within you as you gradually step out of duality into triality.

Connecting

Rainbow meditation

This activation/meditation is a gentle awakening of the Kundalini energies. When your kundalini energies are open you open more and more to Universal Consciousness. Some very famous names have gone before you.

Imagination, Fantasy & Visualization

3 Of the most powerful tools in your creative possession are Imagination, Fantasy, And visualization.

Find the time each day to use these 3 tools.

**Remember!!!
Your thoughts create...**

Words/Thoughts Clarity and Focus

You are already the creators of your reality whether you are consciously aware of it or not.

A tool which can be greatly used to your advantage while consciously expanding your skills is pen and paper. This provides great clarity.

Remember, you create with your every thought, so it is essential if having found yourself thinking doubtfull thoughts to make certain you re-emphasize your desired creation. After a while the clutter of the mind will subside and your thoughts will always be aimed at creating your desires.

Dreams

are your connection to the other realms.

Be consciously aware of your dreams
Dream your dreams and
Live them.

Observer

Knowing when to take action and when to be the observer is crucial while expanding your skills as a conscious creator.

Trust

Is perhaps one of the most important elements in these times. Knowing that time is but an illusion and that all things when allowed will flow in divine flow one of humanities greatest challenges namely:

PATIENCE!

Is no longer relevant.

Thanks,
Gratitude
&
Love for ALL

When thanking the Universe for all you have received before hand you are in fact acknowledging to the universe that you have indeed received it before it has manifested in the physical reality.

To continually be in a state of GRATITUDE! You are also acknowledging to the universe that you have already received.

**When you understand the principle of the ALL and that you and all others are a part of that ALL. YOU have the LOVE for the ALL.
YOU ARE THE ALL & LOVE IS ALL!!!**

Synchronicities

Synchronicities are divinely guided coincidences.

Your signs from the Universe.

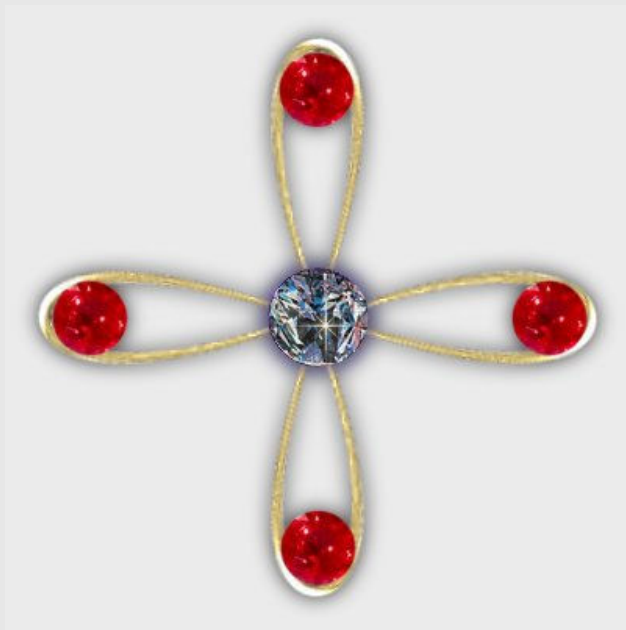

They can take place in many different ways.

In the times we are now living it's essential that you are alert for these signs.

When the signs are there you can act upon them and take action.

Once having taken action, you can become the observer again.

**Why
Self-Consciousness
creates pain
and frustration.**

**How to be
UNIVERSAL
CONSCIOUS
and its magnitude of
advantages.**
